

trippus

TRIPPUS, THE EVENT IN ONE TOOL

An unique digital tool to manage any events in all its phases. TRIPPUS a complete tool that aims to grant participants a better and smoother experience, and, at the same time, optimizing timings and resources for the organizer.

AN 'END TO END' SOLUTION

Trippus allows the management of an event in its 3 macro phases: **before** (location, online registration), **during** (welcoming, badge printing, interaction, communication, table seating), **after** (feedbacks, social sharing)

Communication via e-mail and sms

At any moment before, during and after the event, e-mails and sms text messages can be sent to participants. With the integrated reporting system it is extremely easy to choose with which attendees you wish to get in touch.

Mobile Ticketing and Scanning

Through this functionality you can easily distribute the event tickets on mobile phones. Attendees will receive a text message via sms, a reminder of the event with the location and timing together with a link to the ticket.

Mobile Event App

Through the WebApp Mobile facility, you can publish all the information needed by participants, always relevant and always up to date. Trippus a web-based application that does not need to be downloaded

Follow up Questionnaire & Feedback

Through the WebApp Mobile facility, you can publish all the information needed by participants, always relevant and always up to date. Trippus a web-based application that does not need to be downloaded

**‘TRIPPUS,
YOUR EVENT
